No any suggestion

- 1) all theory section teach with digramatical form
- 2) good teaching
- 3) some subject are not teach

Good teacher

1. Teachers should use projectors
2. Teachers should also teach from reference books rather than only textbooks.
3. Teachers should also provide answer to the back exercise questions inside textbooks.

Help to students

All good

.

Better

Good Teaching

1. Encourage active learning: Teachers should encourage students to participate in class discussions, group projects, and hands-on activities. This approach helps students engage with the material and retain information better.

2. Use technology effectively: Teachers should incorporate technology into their lessons to enhance learning experiences. This can include using multimedia resources, online tools, and educational apps that help students understand complex concepts.

3. Provide personalized feedback: Teachers should provide personalized feedback to students to help them understand their strengths and weaknesses. This can be achieved through one-on-one meetings, written feedback, and rubrics that clearly outline expectations and areas for improvement.

Projector teaching

Very good teaching

Excellent teaching

Use positive specific, purposeful praise so students know what they are doing well and can build mental models so they can replicate it.

1. Foster a student-centered approach: Institutions should prioritize the needs and interests of students by creating a learning environment that is inclusive, diverse, and responsive to individual learning styles. This can be achieved by offering personalized instruction, creating opportunities for student-led initiatives, and promoting collaboration among students.

2. Invest in professional development: Institutions should invest in the professional development of teachers and staff to ensure that they are equipped with the latest teaching strategies and technologies. This can include offering training programs, workshops, and conferences that focus on innovative teaching practices.

3. Emphasize critical thinking and problem-solving: Institutions should emphasize critical thinking and problem-solving skills as essential components of the learning process. This can be achieved by incorporating real-world scenarios, case studies, and project-based learning into the curriculum. Additionally, teachers should provide opportunities for students to reflect on their learning experiences and apply their knowledge to real-world situations.
